

PROPOSAL 227

5 AAC 61.118. Special provisions for the seasons, bag, possession, and size limits, and methods and means for Unit 4 of the Susitna River Drainage Area.

Remove the length restriction on Dolly Varden in Unit 4 as follows:

Arctic Char/Dolly Varden

5 per day,10 in possession

What is the issue you would like the board to address and why? Strange and seemingly pointless dolly varden regulation for Unit 4 Susitna River. Dollies are not common in most of Unit 4. Most are likely caught by accident. If we do catch big enough ones, we may keep it for supper. I'm not sure why we cannot keep two over 12 inches? We generally don't keep any under 12 inches. Not much meat on a 11 inch or smaller dolly. Be rare in most of the unit to catch 5 dollies in a day. Only place I have accomplished this is in DNP of the Yentna River and Judd Lake.
